Delivery & Process: Agile/Scrum, Backlog Refinement, UAT, AS-IS/TO-BE Mapping, BPMN, UML.

Technical Analysis & Tools: SQL, REST APIs, API/Data Flows, System Integration Analysis, Jira, Confluence, Figma, Miro, Draw.io, Excel, Postman.

WORK EXPERIENCE

Acrobats

Prague, CZ

Senior Front-End Engineer

May 2025 - Present

- Elicited requirements for a VoIP app management platform, translating support, configuration, and release needs into user stories, acceptance criteria, and backlog items.
- Developed audit trail functionality for VoIP app changes, adding **100% change-history visibility** and enabling faster investigations without manual code or database checks.
- Designed an in-app version comparator for VoIP app configurations, **cutting review time by 90%+** by replacing archive-based file checks with a visual file-level diff workflow.

Publicis Groupe (Kindred)

Prague, CZ

Senior Front-End Engineer / Delivery Lead

November 2023 - February 2025

- Led delivery coordination for **70+ Pfizer healthcare products**, aligning client requirements, design specifications, QA feedback, and engineering execution across a **5-person team**.
- Improved delivery workflow by contributing to a CLI-based setup for iPad presentation projects, **increasing development speed by 400%** and standardizing project setup.

UdTech

PL / UA

Full-Stack Engineer / Technical Business Analyst

July 2022 - November 2023

- Facilitated requirements clarification with stakeholders and translated business goals into functional requirements, user stories, acceptance criteria, and delivery tasks in **2-week Agile cycles**.
- Built a **custom analytics system from scratch**, enabling real-time product tracking, user behavior visibility, and data-driven decision-making for internal stakeholders.

- Led SEO, accessibility, and user-flow improvements, resulting in a **40% increase in web traffic**, **27% higher accessibility** compliance, and up to **10% higher conversion rates**.

Incode Group

Dnipro, UA

Front-End Engineer

December 2020 - July 2022

- Built a real-time vehicle data logging and trips management system using in-car diagnostic devices, **improving data retrieval speed and operational transparency by 5 times**.
- Analyzed operational data needs and designed data-heavy dashboards, widgets, and debugging flows to improve fleet visibility, issue investigation, and decision-making.

Freelance (Upwork)

Dnipro, UA

Front-End Developer

November 2019 - December 2020

- Worked directly with clients to elicit business needs, clarify scope, prioritize changes, manage expectations, and convert requirements into practical user flows and product features.
- Delivered an event ticketing platform with a team of 4 developers **within 3 months**, supporting feature definition, user-flow implementation, delivery coordination, and client communication.
